Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Takeda (6,104,114).

Takeda discloses in fig. 1 a flat core brushless motor comprising: a rotor case (18), a stator (30) including a plurality of stator cores (32), each stator core having a protruding pole and an armature coil(32) wound around the protruding pole. Takeda also disclosed, a stator base having a generally planar portion including a plurality of through holes, each through hole receiving part of a respective armature coil (32), and a plurality of supports (27) bent from and transverse to the generally planar portion supporting the stator, wherein the stator supports and the plurality of stator coils are equal in number. Takeda also disclose, a shaft (22) fixedly mounted to the stator base, at a center of the stator base, and extending through a center of the rotor case; a flexible circuit board (44) located between the stator base and the stator, having a plurality of holes smaller than the through holes(40), located opposite respective through holes and covering edges of the respective through holes; and a bearing(14) located intermediate the supports and the shaft, rotatably supporting the rotor case on the shaft(22).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takeda in view of Saneshige (5747908).

As seen above, Takeda substantially discloses the claim invention, however Takeda do not disclose the stator cores having a recess complementary to and receiving the corresponding support.

Saneshigh disclose in fig. 4 a flat core brushless motor comprising: a plurality of stator cores including a recess complementatry to and receiving the corresponding support for the purpose of limiting the movement of the rotor in an axial direction. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the motor of Takeda with the stator structure of Saneshigh for the purpose to providing support for the motor.

Response to Arguments

5. Applicant's arguments with respect to claim 10 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
